

# Fundamentals of Deep Learning and Programming

## Lecture 0: Course Overview

Fall 2025

**Adjunct Professor: Donghoon Kang**

---

# Course Overview

Lecture Time

Fridays, 2 PM – 5 PM

Classroom

Room: L3 301, 302 (3334A, B)

Evaluation Criteria

Attendance (10%)

Programming Assignments (5%)

Term-project (15%)

Mid-term (30%), Final (40%)

- Programming assignments: students should submit the **code** and **1 ~ 2 page document** briefly explaining the code to me by **email** ([chocopie@kist.re.kr](mailto:chocopie@kist.re.kr))

# Course Overview

- Absences are **allowed up to two times**, but 2 points will be deducted from the 3rd absence.
- Students who have five or fewer absences and submit all assignments and term projects will receive **at least a B+ grade**, even if their midterm and final exam scores are very low.
- The purpose of this course is not to evaluate students, but to help them **develop basic knowledge and programming skills in deep learning**, a recent trend.

# Term Project

Must be performed **alone**

- Should **select a paper** published only in **CVPR, ICCV, ECCV, or NeurIPS after 2022 (inclusive)**.
- Should **write an 5 ~ 6 page report** **analyzing the "training code"** of the selected paper.

**Before Week 7 (10.17)**

Should decide which **paper** to **choose**. (also possible to change another paper later)

**Before Week 15 (12.12)**

Should **submit** an **5 ~ 6 page report** as a term-project.
